

Vinay Singh Jadon

Product Manager | AI-enabled Workflows & Operations Platforms | IIT Bombay
Pune, India | +91-9560462042 | vsjadon.iitb@gmail.com | linkedin.com/in/vsjadon

SUMMARY

Product Manager with 3+ years in product management, building AI-enabled workflows and operations platforms in B2B and supply-chain contexts. Strongest at turning messy workflows across documents, people and tools into reliable systems, from discovery through integrations and rollout.

EXPERIENCE

Associate Product Manager – AI & Workflow Platforms | Wootz.Work Pune | Jan 2025 – Present

Joined as the 2nd member of the product team at a cross-border engineering procurement platform; work closely with the COO and own 0-to-1 initiatives from discovery and trade-offs through workflow design, integrations, rollout and iteration.

- **AI document workflows:** Built human-in-the-loop workflows combining OCR and LLMs to convert client and engineering documents into structured operational data, reducing manual processing time by ~5x.
- **Supplier intelligence:** Built and owned the supplier platform end to end, structuring onboarding, NDAs and capability data across 1,600+ suppliers to improve supplier discovery and sourcing decisions.
- **Request-to-quote pipeline:** Built the pipeline connecting sales and supply teams: automated request capture, document workspace creation, team routing and templated quote generation; ~350 requests and 150+ quotes processed since launch.
- **Quality & inspection:** Owned a mobile-first inspection and quality system end to end, from discovery and user research through design, rollout and support; cut inspection cycle time (start to approval) by 50%+, with 600+ inspections completed across 150+ projects by 50+ cross-functional users.
- **Integrations & automation:** Built data syncs, notifications and document-generation workflows across tools using third-party APIs, improving data reliability and information flow.

Associate Product Manager | Brane Group Hyderabad | Jan 2024 – Sep 2024

Built enterprise workflow software for an Australian client in an 18-member cross-functional team, owning product flows from problem discovery and UX/data-flow design through engineering handoffs and client demos.

- **Proposal review & configuration:** Designed centralized workflows for quote creation, proposal review and product/pricing configuration, replacing fragmented manual coordination with structured reviews, version tracking and configuration controls.
- **Multi-role workflow design:** Defined role-based UX, permissions and data flows across the proposal lifecycle; presented owned workflows in client demos and translated feedback into iterations.
- **Port operations:** Mapped port-operations workflows and pain points and translated them into product flows for a new solution.

Product Management Intern | Kirana Club (acquired by Meesho) Bengaluru | Jun 2023 – Dec 2023

B2B community and commerce platform for 2M+ kirana/FMCG stakeholders. Sole dedicated product person on the team, reporting to the founders; owned user research, analytics, UX, experimentation and rollout.

- **KYC onboarding:** Analyzed the onboarding journey, ran user research and worked with ops to redesign KYC flows, reducing rejection rates by ~10%.
- **Incentives & rewards:** Redesigned and A/B tested incentive experiences, reducing feature adoption time by ~30% and reward costs by ~5%.
- **User intelligence & analytics:** Built a profiling pipeline for 10,000+ users; owned KPI dashboards, Mixpanel funnels, release monitoring and product experiments.

EARLIER EXPERIENCE

Founder | Re.Liv Mumbai | Jan 2022 – Sep 2022

Founded at IIT Bombay; ran 70+ customer interviews, took the product from discovery through early validation and pivoted toward automating operational workflows for businesses run by older adults. Supported by IIT Bombay's IDEAS program.

Startup & Consulting Roles | AiOmix, Vivid Nutripharm 2021 – 2023

- **Founder's Office Intern, AiOmix** (healthcare AI, Abu Dhabi): market and competitive research; curated datasets and provided biological domain inputs for NLP pipelines (NER, relation extraction).
- **Product Consultant, Vivid Nutripharm** (Hyderabad): product feasibility, market research and unit economics across nutrition and biotech products.

EDUCATION

Indian Institute of Technology Bombay – Master's in Biotechnology (Minor: Entrepreneurship) | CPI 9.1 | IIT JAM AIR 13 2022
University of Delhi – Bachelor's in Life Sciences | CPI 8.3 2020

SKILLS

Product: Product Management, Product Discovery, Product Strategy, User Research, UX Design, Stakeholder Management

AI & Systems: Generative AI, LLMs, Workflow Automation, APIs & Integrations, OCR, Process Improvement

Analytics: Product Analytics, SQL, Mixpanel, A/B Testing, Funnel Analysis

Domains: B2B Products, Supply Chain Operations
